M2

Advancing Innovation
in Health, for People
and the Planet

“Safeguarding people’s health and wellbeing has been a key priority throughout the UAE’s journey. We reaffirm this commitment, as we continue to build an advanced healthcare system and contribute to disease eradication efforts around the world.”

HIS HIGHNESS SHEIKH MOHAMED BIN ZAYED AL NAHYAN
PRESIDENT OF THE UNITED ARAB EMIRATES

"Our mission at **M42** is to reshape the future of health in a sustainable manner, with technology as a key enabler. Through our innovative use of medical and data-centric technologies, including genomics and artificial intelligence, we are pioneering a proactive and collaborative approach to health and wellbeing.

Our aim is to lay the foundations for a world in which people are empowered, their health conditions are both anticipated and prevented, and the planet remains a key consideration within our groundbreaking solutions.

We're not just redefining healthcare, we're reimagining health itself to create a more sustainable approach for people and the planet."

Hasan Jasem Al Nowais
Managing Director and Group Chief Executive Officer

Advancing innovation in health, for people and the planet

M42 is a global health champion, formed through the coming together of **G42 Healthcare** and **Mubadala Health.**

M42

M42 combines G42 Healthcare's unique medical and data-centric technologies with Mubadala Health's world-class patient services and state-of-the-art facilities to provide the highest level of personalized, precise, and preventative care.

Operating at the forefront of medical advancement, **M42** is set to transform the way care is delivered, bridging the gap between the latest healthtech advancements and the clinical outcomes patients receive.

M42 Companies

مبادلة للرعاية الصحية
Mubadala Health

Mubadala Health was founded in 2006 and operates a vast network of integrated, state-of-the-art healthcare facilities across the United Arab Emirates and the region. With a goal to transform the regional healthcare landscape, Mubadala Health's facilities provide world-class care centered around a patients-first philosophy.

G42 Healthcare

G42 Healthcare was founded in 2018 to deliver advanced healthcare technology solutions with the aim to transform the future of healthcare. Since its inception, G42 Healthcare has partnered with governments, leading international entities, scientists, researchers, and the wider medical community to become a leading AI-powered healthcare technology company.

M42 Shareholders

MUBADALA

Mubadala Investment Company is a sovereign investor managing a diverse portfolio of assets in the UAE and abroad.

Diaverum

World's 3rd Largest Dialysis Provider.

Diaverum is a multinational healthcare organization originating from Sweden, specializing in providing life-enhancing renal care to patients diagnosed with chronic kidney disease. With a patient-centric approach, Diaverum offers a comprehensive range of treatments, including preventive care, hemodialysis, peritoneal dialysis, home care, and coordination of comorbidities, along with the provision of holiday dialysis services.

Driven by a commitment to improving medical outcomes and enhancing patient longevity, Diaverum has developed a digitalised Care Delivery Model. This model is designed to ensure optimal medical outcomes, leading to reduced hospitalization rates and improved overall well-being for its patients.

Service line offerings

Preventive care | **Hemodialysis** | **Peritoneal dialysis** | **Home care**
Holiday dialysis | **Kidney transplant**

Key Facts

Diaverum's exceptional care delivery model, powered by an innovative digital infrastructure and a purpose-driven culture of True Care, guarantees consistently outstanding dialysis service for every patient across its global network of clinics. This standardized and proprietary approach sets a benchmark in the industry.

Diaverum provides unparalleled value to both patients and national healthcare systems. Its vision is to transform the industry through patient-centric digital innovations, delivering and broadening access to the highest quality of care.

Pillars of Excellence

The five pillars of Diaverum's digitilised care delivery model ensure a high quality of care through standardization and benchmarking of the best evidence-based practices:

- Clinical standards
- Medical standards
- Performance measurement
- Patient and staff education
- Scientific research

By M42

GENSENSE
By M42

Multi-omics

Omics Centre of Excellence is invested in the accentuated power of genomic, clinical and cross- disciplinary data that enables healthcare transformation.

Region's **largest** and most **advanced** Omics facility - as an enabler of Emirati Genome Program

Biobank has capacity to store **1.3 million** bio samples currently with an expansion capacity of up to 3 million

Annual throughput that exceeds **500K WGS** with strong and customizable in- house bioinformatics capabilities

Platform agnostic solutions with **3 leading NGS solutions** under one roof

Value to dataset through **agrigenomics, proteomics, transcriptomics, epigenetics** and **metagenomics**

Country genome programs, Omics-based wellness and longevity projects **enabled by agile, modular bioinformatic** workflows

الجينوم الإماراتي
EMIRATI GENOME

Emirati Genome Program (EGP)

One of the UAE's flagship health initiatives, combining advanced genomic research with the power of precision medicine.

By mapping the genetic makeup of Emiratis, the program is helping healthcare providers anticipate risks for hereditary conditions, inform public health policies, and create personalized, preventive and predictive health strategies.

780K UAE Nationals took part in the EGP.

1,123+ government and private organizations supported and collaborated with the program.

Environmental Sciences

A health-tech division of M42 that focuses on interdisciplinary research and analysis of non-human factors affecting the environment and public health. Leveraging advanced technologies, it provides real-time insights to support informed decision-making and drive impactful solutions.

Cutting-edge laboratory management services including **design, build, operate & transfer model.**

Proprietary data-powered AI & Tech-enabled processes and products, provide real-time insights for intelligent decision-making and streamlined augmented data analytics.

First of its kind **Environmental testing** laboratory in the **MENA region** – Partnering with ADQCC.

Enable **real-time Biochemical Surveillance** using wastewater-based epidemiology (WBE) & sequencing for national biosecurity & public health monitoring.

Non-human Genome Sequencing & Biobanking at scale and in depth including **Agri-genomics** Capabilities.

Unique Turnkey solutions using our **advisory & consultancy** offering.

MED42

A generative AI model developed for the global healthcare community. It is designed to respond to medical prompts and questions ethically, safely, and efficiently.

Achieved an impressive **72% score** on United States Medical Licensing Examination (USMLE) sample questions.

LLM model trained with over **70 billion** parameters.

Digital Health Solutions

Driving innovation with AI and digital health, this platform scales solutions like Malaffi to enhance patient outcomes, empower providers, and improve healthcare access locally and globally.

MALAFFI
CONNECTING HEALTHCARE

DEPARTMENT OF HEALTH

One of the fastest implemented health information exchanges in the world

Strategic initiative of the Department of Health – Abu Dhabi

Malaffi is the region's first Health Information Exchange platform, that safely and securely connects public and private healthcare providers in the Emirate of Abu Dhabi. Malaffi enables the meaningful, real-time exchange of important patient health information between the healthcare providers, creating a centralised database of unified patient records, improving healthcare quality and patient outcomes.

3, 000+ licensed facilities, medical centers, and clinics connected

- **Hospitals**
- **Laboratories and Radiology Diagnostics**
- **Government Centers** (Population and public health)
- **Pharmacies**
- **Patient Medical Records**
