

Advancing Innovation
in Health, for People
and the Planet

“Safeguarding people’s health and wellbeing has been a key priority throughout the UAE’s journey. We reaffirm this commitment, as we continue to build an advanced healthcare system and contribute to disease eradication efforts around the world.”

HIS HIGHNESS SHEIKH MOHAMED BIN ZAYED AL NAHYAN
PRESIDENT OF THE UNITED ARAB EMIRATES

“Our mission at **M42** is to reshape the future of health in a sustainable manner, with technology as a key enabler. Through our innovative use of medical and data-centric technologies, including genomics and artificial intelligence, we are pioneering a proactive and collaborative approach to health and wellbeing.

Our aim is to lay the foundations for a world in which people are empowered, their health conditions are both anticipated and prevented, and the planet remains a key consideration within our groundbreaking solutions.

We’re not just redefining healthcare, we’re reimagining health itself to create a more sustainable approach for people and the planet.”

Hasan Jasem Al Nowais
Managing Director and Group Chief Executive Officer

| **M42** is a global health champion, formed through the coming together of **G42 Healthcare** and **Mubadala Health**.

M42

M42 combines G42 Healthcare's unique medical and data-centric technologies with Mubadala Health's world-class patient services and state-of-the-art facilities to provide the highest level of personalized, precise, and preventative care.

Operating at the forefront of medical advancement, **M42** is set to transform the way care is delivered, bridging the gap between the latest healthtech advancements and the clinical outcomes patients receive.

M42

M42 Companies

Mubadala Health was founded in 2006 and operates a vast network of integrated, state-of-the-art healthcare facilities across the United Arab Emirates and the region. With a goal to transform the regional healthcare landscape, Mubadala Health's facilities provide world-class care centered around a patients-first philosophy.

G42 Healthcare was founded in 2018 to deliver advanced healthcare technology solutions with the aim to transform the future of healthcare. Since its inception, G42 Healthcare has partnered with governments, leading international entities, scientists, researchers, and the wider medical community to become a leading AI-powered healthcare technology company.

M42 Shareholders

Mubadala Investment Company is a sovereign investor managing a diverse portfolio of assets in the UAE and abroad.

G42 is the leading Abu Dhabi-based AI technology holding group creating visionary artificial intelligence for a better tomorrow.

Vision

Diaverum

World's 3rd Largest Dialysis Provider.

Diaverum is a multinational healthcare organization originating from Sweden, specializing in providing life-enhancing renal care to patients diagnosed with chronic kidney disease. With a patient-centric approach, Diaverum offers a comprehensive range of treatments, including preventive care, hemodialysis, peritoneal dialysis, home care, and coordination of comorbidities, along with the provision of holiday dialysis services.

Driven by a commitment to improving medical outcomes and enhancing patient longevity, Diaverum has developed a digitalised Care Delivery Model. This model is designed to ensure optimal medical outcomes, leading to reduced hospitalization rates and improved overall well-being for its patients.

Service line offerings

- Preventive care
- Hemodialysis
- Peritoneal dialysis
- Home care
- Holiday dialysis
- Kidney transplant

Key Facts

Diaverum's exceptional care delivery model, powered by an innovative digital infrastructure and a purpose-driven culture of True Care, guarantees consistently outstanding dialysis service for every patient across its global network of clinics. This standardized and proprietary approach sets a benchmark in the industry.

Diaverum provides unparalleled value to both patients and national healthcare systems. Its vision is to transform the industry through patient-centric digital innovations, delivering and broadening access to the highest quality of care.

Pillars of Excellence

The five pillars of Diaverum's digitalised care delivery model ensure a high quality of care through standardization and benchmarking of the best evidence-based practices:

- Clinical standards
- Medical standards
- Performance measurement
- Patient and staff education
- Scientific research

- 14,000 m² Dedicated to diabetes care
- 4 Medical facilities
- 13 Medical specialties
- In-house research institute
- In-house pharmacy
- In-house laboratory

Imperial College London Diabetes Centre

Global leader in diabetes and endocrine treatment, education and research.

Established in 2006 by Mubadala in partnership with the UK's Imperial College London, Imperial College London Diabetes Centre specializes in treating all types of diabetes and endocrine disorders, as well as focusing on diabetes research, training, and public health awareness. The Centre, which operates four branches across Abu Dhabi, Al Ain and Al Dhafra, has gained international recognition for its holistic approach to the treatment of diabetes and related complications that enables patients to receive the full spectrum of care in one place.

Service line offerings

- Diabetes
- Endocrinology
- Obesity & Bariatric
- Heart Disease Prevention
- Kidney Health
- Podiatry
- Ophthalmology
- Pediatrics
- Dietetics
- Diabetes Education
- Diabetes Remission
- Cardiology
- Clinical Psychology

Key Facts

More specialized doctors under one roof than any other diabetes center in the UAE with more than 80 physicians, of which 60% have been trained or have worked in the United Kingdom and 68% speak Arabic.

In collaboration with international academics at Imperial College London, the University of Oxford and the University of Groningen (the Netherlands), to name a few, Imperial College London Diabetes Centre's research institute conducts research that concentrates on genetic, behavioral and psychological factors of diabetes and its complications, with research teams covering specific areas of medical and scientific concern in the region.

Accreditations

- Earned the Gold Seal of Approval[®] from the Joint Commission International (JCI) for both the JCI Clinical Care Program Certification (CCPC) for Diabetes Management and the JCI Accreditation for Ambulatory Care.
- European Association for the Study of Obesity (EASO) accredited.
- Approved as a Centre of Excellence by the International Diabetes Federation (IDF).

Integrated Health Solutions

Focused on national programs and population health, addressing global health disparities through genomics, biobanking, data services, environmental sciences, and clinical research and trials.

Insights Research Organisation Solutions (IROs)

The first UAE-based Contract Research Organization (CRO) specializing in healthcare research.

IROS is the UAE's first registered and home-grown contract research organization. IROS was established to promote clinical trials and research with pharma stakeholders to improve patient outcomes, in line with the Abu Dhabi Economic Vision 2030.

Service line offerings

- Research Organisation Services
- Project Management
- Medical Writing, Statistics, and Analytics
- Regulatory Affairs
- Bio-statistics
- Data Management
- Insights Services
- Real-World Evidence (RWE) Studies
- Observation Studies
- Patient Engagement Studies

Key Facts

- Completed the world's 1st and largest Phase III covid-19 vaccine trial.
- 35 projects completed to date (mix of phase II, III and IV trials).
- Undergone and successfully passed vendor audits conducted by US sponsors.
- Successfully registered and qualified as a vendor (to undertake clinical trials) with multi national pharmaceutical companies.

Experience

- Strong Therapy experience in the following areas:
- Immunology (including Vaccines)
 - Oncology
 - Cardiovascular
 - Neurology
 - Diabetes

Abu Dhabi Biobank

A leading regional hub for biobanking excellence, leveraging extensive biological and medical data to drive scientific breakthroughs. It accelerates drug discovery and contributes to solving local and global health challenges, with a strong focus on advanced health therapies, personalized treatment, and preventive care to enhance clinical outcomes.

A cornerstone of **health transformation**, advancing therapeutic treatments and life science research to drive medical innovation.

Region's largest biobank offering multimodal cord blood and pan human banking.

Positioned to address the critical need for **cord blood stem cells** in the fight against life-threatening and prevalent diseases such as thalassemia, sickle cell disease, and cancer.

Capacity to store 100,000 cord blood samples and five million pan human samples.

The **first-of-its-kind** sustainable biobank facility, featuring 38 liquid nitrogen (LN2) tanks operating at -196°C and a large, automated storage infrastructure for -80°C preservation.

A rich and diverse dataset that offers readily available, **better-matched hematopoietic stem cells on a global scale**, facilitates novel drug discovery targets, and supports disease prevention initiatives.

Advanced Diagnostics

Built to address the need for population-scale detection and diagnosis of various infections.

~8,000 m² of laboratory space across multiple sites

250+ Comprehensive clinical genetics panel

Access to **10+ countries** with high prevalence of rare diseases

12+ Clinical trials conducted so far

50,000+ Capacity to support whole exome sequencing and whole genomes sequencing samples/week

50+ advanced sequencing machines

Multi-omics

Omics Centre of Excellence is invested in the accentuated power of genomic, clinical and cross- disciplinary data that enables healthcare transformation.

Region's **largest** and most **advanced** Omics facility - as an enabler of Emirati Genome Program

Biobank has capacity to store **1.3 million** bio samples currently with an expansion capacity of up to 3 million

Annual throughput that exceeds **500K WGS** with strong and customizable in- house bioinformatics capabilities

Platform agnostic solutions with **3 leading NGS solutions** under one roof

Value to dataset through **agrigenomics, proteomics, transcriptomics, epigenetics** and **metagenomics**

Country genome programs, Omics-based wellness and longevity projects **enabled by agile, modular bioinformatic workflows**

Emirati Genome Program (EGP)

One of the UAE's flagship health initiatives, combining advanced genomic research with the power of precision medicine.

By mapping the genetic makeup of Emiratis, the program is helping healthcare providers anticipate risks for hereditary conditions, inform public health policies, and create personalized, preventive and predictive health strategies.

780K UAE Nationals took part in the EGP.

1,123+ government and private organizations supported and collaborated with the program.

Environmental Sciences

A health-tech division of M42 that focuses on interdisciplinary research and analysis of non-human factors affecting the environment and public health. Leveraging advanced technologies, it provides real-time insights to support informed decision-making and drive impactful solutions.

Cutting-edge laboratory management services including **design, build, operate & transfer model.**

Proprietary data-powered AI & Tech-enabled processes and products, provide real-time insights for intelligent decision-making and streamlined augmented data analytics.

First of its kind **Environmental testing** laboratory in the **MENA region** – Partnering with ADQCC.

Enable **real-time Biochemical Surveillance** using wastewater-based epidemiology (WBE) & sequencing for national biosecurity & public health monitoring.

Non-human Genome Sequencing & Biobanking at scale and in depth including **Agri-genomics** Capabilities.

Unique Turnkey solutions using our **advisory & consultancy** offering.

MED42

A generative AI model developed for the global healthcare community. It is designed to respond to medical prompts and questions ethically, safely, and efficiently.

Achieved an impressive **72% score** on United States Medical Licensing Examination (USMLE) sample questions.

LLM model trained with over **70 billion** parameters.

Digital Health Solutions

Driving innovation with AI and digital health, this platform scales solutions like Malaffi to enhance patient outcomes, empower providers, and improve healthcare access locally and globally.

شركة أبوظبي لخدمات البيانات الصحية
